Experience

Company Name – City, Region

Month Year – Present

Staff Software Engineer

Describe the platform, product area, team size, or system scale.

- Defined the technical direction for [platform or product area], documented tradeoffs across [scale, security, cost, and operability], and aligned [N] teams on a phased architecture plan.
- Led [multi-quarter initiative] across [engineering, product, data, and operations], resolved dependencies, and delivered [customer or business outcome] by [date].
- Established SLOs and error budgets for [critical systems], introduced [observability or resilience practice], and improved [availability, incident rate, or MTTR] by [X%].
- Mentored [N] engineers and technical leads through design reviews, delegation, and growth plans, strengthening [ownership, onboarding, or promotion readiness].

Previous Company – City, Region

Month Year – Month Year

Senior Software Engineer

Describe the service, customer workflow, or engineering domain.

- Designed and delivered [service or product capability] handling [N requests, users, or events], meeting [latency, availability, or security target] and enabling [outcome].
- Led a migration from [legacy system] to [target architecture] in [N] phases, avoiding [downtime or data loss] and reducing [cost, latency, or complexity] by [X%].
- Turned ambiguous requirements into milestones, delegated work across [N] engineers, and coached the team through rollout and adoption.
- Improved release safety with [automated tests, CI/CD, or feature flags], changing [deployment frequency or change failure rate] from [before] to [after].

Earlier Company – City, Region

Month Year – Month Year

Software Engineer II

- Built and operated [API, service, workflow, or data pipeline] used by [customer or internal team], improving [speed, accuracy, or throughput] by [X%].
- Diagnosed [performance or reliability bottleneck] with [profiling, tracing, or load testing] and changed [component] to meet [target].
- Led [scoped project] from design through rollout and supported teammates with code reviews, pairing, and technical documentation.

Experience Continued

Earlier Company – City, Region <i>Software Engineer</i>	Month Year – Month Year
- Implemented [backend, frontend, or full-stack feature] for [user group], working with [product, design, or QA] to ship [outcome]. - Developed and maintained [API, background job, or integration] that processed [N requests, records, or events] per [time period]. - Wrote [unit, integration, or end-to-end] tests for [workflow] and fixed [class of defect], improving [quality measure] from [before] to [after]. - Participated in on-call support, investigated production issues, and documented [runbook or operating procedure] for the team.	

First Company – City, Region <i>Associate Software Engineer</i>	Month Year – Month Year
- Shipped scoped improvements to [application or service] with [language, framework, or database], meeting [acceptance or performance requirement]. - Resolved defects in [component], added regression tests, and reduced [support issue, failure rate, or manual work] by [X%]. - Documented [system, setup, or workflow] and incorporated code-review feedback to improve maintainability and team handoffs.	

Skills

- Architecture:** System design, distributed systems, APIs, data modeling, reliability, performance, and security.
- Technical Leadership:** Architecture reviews, RFCs, roadmap planning, incident leadership, mentoring, and cross-team delivery.
- Languages & Frameworks:** [Language], [Language], [Framework], [Framework].
- Platforms & Tools:** [Cloud], [Database], [Messaging], [Observability], [CI/CD].

Education

Dalhousie University – Halifax, NS <i>BS Computer Science</i>	January 2019 – December 2022
Teaching Assistant for Server-side Scripting and Web Development.	
Simon Fraser University – Vancouver, BC <i>BS Computing Science</i>	May 2018 – December 2019
Transferred to Dalhousie University.	

Certifications

Professional Certification <i>Issuing Organization</i>	Year
Additional Certification <i>Issuing Organization</i>	Year
